

**Subject: TIW Manufacturing Seminar**

## Is Your Software Built From the Ground Up For Manufacturing and Distribution?

### Attend This Seminar To See One That Is...

**Aiding & Abetting  
the Manufacturing  
or Distribution  
Company**

**TIW**  
TECHNOLOGY

**DATE:** Sept. 25, 2008  
Thursday

**TIME:** 8:00 - Noon

**LOCATION:**  
PSSI Offices

Dear Ted,

Are you looking for a new manufacturing system? More importantly, **are you looking for better information** with which to manage your business?

Whether you're now using TIW Workshop, Sage PRO Manufacturing, Sage MAS 90\*200 Manufacturing or some other system, this seminar can help you see the difference between a system that was developed from the ground up, in a Windows environment, for manufacturing and distribution companies versus systems that have only been slowly evolving both into the windows environment and through the use of incidental add-on modules.

Please join us for the TIW business building seminar for manufacturers and distributors on September 25, 2008, to see what a 21st Century system really looks like.

(PS: If you don't work for a manufacturer or distributor, forward this e-mail to your friends and associates who do -- be sure to tell them to tell us you sent them!)

6561 Lonewolf Drive  
Suite 200  
South Bend, IN 46628

**Phone:** 574-239-2444

## ALERE: A True Manufacturing & Distribution Solution for the Real World

Attend this free executive briefing to see the benefits  
you'll gain from running a real manufacturing system.

### **At this seminar, you will learn how . . .**

- modular and variable bills of material can reduce your number of BOMs while increasing accuracy
- rules-based sales order configuration can give you a huge competitive edge
- material planning (MRP) is accomplished with a single pass that includes all levels in a bill down to purchased components
- simple it is to prioritize orders with finite scheduling - the way things work in the real world
- to integrate material planning with shop floor scheduling for truly synchronous manufacturing
- you can disassemble and return components to inventory quickly and easily

A handwritten signature in black ink that reads "Ted Myers".

**Do You Know Anyone Not  
Interested in Cutting Costs Today?**

Of course not!

Simply put. . .

**In business, technology cuts costs.  
Great technology cuts costs greatly!**

## Aiding & Abetting the Manufacturing or Distribution Company

**DATE:** Sept. 25, 2008

Thursday

**TIME:** 8:00 - Noon

**LOCATION:**

PSSI Offices  
6561 Lonewolf Drive  
Suite 200  
South Bend, IN 46628

**Phone:** 574-239-2444

That's why you need to invest just one-half day of your time to see how to cut **YOUR** costs of doing businesses, effectively and long-term. But you must hurry.

Rod Hatcher, TIW Technology

In two days, this Thursday at our offices, Rod Hatcher of Easton, PA, President of TIW Technology, Inc. will give an in-depth, private three-hour executive overview of the software system we have used for 15 years to help our clients reduce waste, improve operations and cut costs. This is one cost-saving solution you can't afford not to consider.

**When:** 8:30 AM til Noon this Thursday, Sept. 25th.

**Where:** PSSI offices, South Bend, IN

**Who:** Rod Hatcher, co-Founder/President, TIW Technology, Inc., Easton, PA

**What:** ALERE Manufacturing - The complete shop floor and business management solution

**ALERE**  **Manufacturing**

There are a few slots left. The session is FREE, but registration is required. Continental breakfast is included, starting at 8:00. And Rod will be available to answer your individual questions when his demonstration ends at noon.
