

The Top Ten Reasons for Choosing ALERE®

ONE	Automatic Period Closings	No more late evenings or wasted weekends making closing entries and releasing batch postings to the general ledger before you are ready to operate in the next period. Or, what is even worse, having to deal with a computer crash during a closing process!
TWO	Enter Company Info Once	Whether the companies you do business with are customers, suppliers, or both, their information is entered in only one place - one time! This lets you turn credit memos into payables easily and offset payables and receivables from the same company!
THREE	Mass Shipping & Receiving	Designed for businesses with lots of shipping and receiving activity! Ship or receive orders en masse from one screen! Supports ship only and receive only which allows processing orders without releasing invoices! Ship and receive in a fraction of the time it takes to do orders one-by-one!
FOUR	Pending Orders	Create all types of orders in sales and purchases without releasing them live! Queue up orders and release them as needed! Save partially completed orders and finish them later without throwing them out and starting over! Pending orders makes it easy to review orders before they are accepted!
FIVE	Line Types	Give your customers better service by handling their sales, credits and returns all on one order! Each line on a sales order may be set as a Sale , Return or Credit . Each line on a purchase order can be set as a Purchase , Return or Credit . Get rid of all the extra work and costs of creating and processing multiple orders to achieve the same results!
SIX	Recreate Invoices	The returned check process voids the payment, recreates the invoice(s), and handles the GL entries all in one step! The void check process voids the payment, recreates the payable(s), and handles the GL entries all in one step! The Aged Receivables & Payables are maintained!
SEVEN	Sales Order Configuration	Choose features and options for an item while it is being entered on an order! Built in kitting that can be configured! Finished good part numbers that are automatically assigned based on the configuration! Make your orders more accurate and do away with expensive product manuals!
EIGHT	Modifications	The advanced table-driven architecture of ALERE allows you to make modifications easier and faster than any other package! Best of all, the changes that are made can be brought forward to new product releases! That preserves your investment!
NINE	GL Posting Tab	See the actual GL journal entries, in real time, that go with anything you do in ALERE! Immediately verify that the transactions are correct! No more wasting time trying to track down a problem on an invoice a month later! Go right to the source!
TEN	TIW	Doing business for more than twenty years with thousands of companies using our software! You are our number one priority! If you want to work with people that will do their best to make sure their products will work for you - try TIW!
